DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 7/15/02 has been entered.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being

Art Unit: 2872

examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

3. Claims 1 and 6 are rejected under 35 U.S.C. 102(e) as being anticipated by Hoek ('402) made of record.

The limitation of a folding mechanism for "operably folding and maintaining the mirror in forward direction" is seen to be met by Hoek, wherein the spring folding/pivoting device operates in a manner to fold the mirror forwardly as shown in figs. 1 and 12 (note the forward orientation of the mirror relative to the vehicle door). Note also that this necessarily reduces the overall width of the vehicle.

4. Claims 1 and 6 are rejected under 35 U.S.C. 102(e) as being anticipated by Oesterholt et al.

Oesterholt discloses a mirror device including a mirror housing assembly(3), sail(2), and folding mechanism(10) which is operable to fold and maintain the mirror in a forward direction, thereby reducing the overall width of the vehicle (note figs. 2A-2C and columns 12-14, particularly column 14 lines 32-37).

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claim 10 is rejected under 35 U.S.C. 103(a) as being unpatentable over Hoek ('402) in view of Hoek ('743), both made of record.

Claim 10 stands rejected as discussed in the previous office action.

7. Claim 10 is rejected under 35 U.S.C. 103(a) as being unpatentable over Oesterholt et al in view of Hoek ('743) made of record.

Oesterholt does not teach the mirror assembly to include a microphone or speaker. However, such features are common in mirror assemblies and an example is shown by Hoek (note col. 9). It would have been obvious to the ordinarily skilled artisan at the time of invention to include either a microphone or speaker

Art Unit: 2872

in Oesterholt's device in order to allow for sound to be emitted from or received by the mirror assembly.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Stolpe et al shows a folding device for a mirror assembly.
